Demographics, purchase details, and shopping behaviour — cleaned and loaded into PostgreSQL.

Revenue by Gender

Key Insight

Female customers generated **higher total revenue** than male customers across all product categories.

Shipping Type & Average Spend

Express Shoppers Spend More

Customers choosing Express shipping have a **significantly higher average purchase amount** — a key segment for premium targeting.

Subscribers vs. Non-Subscribers

Subscription Drives Value

Subscribers spend **~40% more** on average and contribute disproportionately to total revenue.

- Boost subscriptions with exclusive benefits.

Customer Segmentation

Three Customer Tiers

- **New** — First-time buyers, growth opportunity
- **Returning** — Repeat shoppers, loyalty potential
- **Loyal** — High-frequency, highest lifetime value

Revenue by Age Group

26–35 Dominates

The **26–35 age group** is the highest-revenue segment — prime target for marketing campaigns.

Top Products by Category

Most purchased products within each category — ideal for featured campaigns.

Power BI Dashboard

Interactive dashboard built to present all key insights — revenue, segments, shipping, and product performance — in one unified view.

Business Recommendations
